EXECUTIVE SUMMARY

14 years' experience across diverse domains, leading product initiatives from microservices migration to impactful features; currently enhancing product and analytical skills through UW's MSIS program.

WORK EXPERIENCE

Dell Technologies - Global leader in PCs and IT infrastructure solutions

Bangalore, India

Senior Software Engineer

Mar 2018 – Feb 2023

- **Product Scalability & Performance Optimization:** Migrated a key data center app from monolith to Kubernetes-based microservices, supporting 8,000 servers and boosting performance by 60%.
- **Feature Delivery & Team Leadership:** Led 5 developers to launch 8 high-impact server monitoring features in 6 months, driving 15% user adoption growth.
- **Quality & Reliability Leadership:** Implemented proactive quality enforcement, achieving 100% automation and code coverage, preventing recurrence of critical issues.
- **Customer-Centric Product Enhancements:** Translated pain points into 7 product improvements, with 5 prioritized in the roadmap, reducing support tickets by 25% and earning stakeholder recognition.
- **Product Security & Vulnerability Management:** Facilitated remediation using tools like SonarQube and BlackDuck, cutting high-severity issues by 60% and strengthening product security.

HCL Technologies - Global IT services leader

Bangalore, India

Technical Lead

Jan 2015 – Jan 2018

- **Product Migration & Stakeholder Collaboration:** Partnered with Toyota Motors stakeholders to evaluate legacy COBOL-to-Java migration, defining clear product migration goals and feasibility.
- **Scalable Service Design:** Designed and developed RESTful services, improving maintainability by 40% and enabling future product enhancements.
- **Security & Compliance Leadership:** Integrated SonarQube scans into development lifecycle, identifying and resolving 100+ vulnerabilities, reducing critical security issues by 90%.
- **Team Development & Productivity:** Mentored 5+ developers, boosting productivity by 25% and strengthening the team's ability to deliver key product objectives.

iGATE Global Solutions (Now Capgemini) - IT services and outsourcing provider

Bangalore, India

Senior Software Engineer

Mar 2010 - Jan 2015

- **Product Development & Efficiency Gains:** Led development of GE Transportation's Trip Optimizer, delivering feature upgrades that improved operational efficiency and reduced fuel consumption by 5%.

- **User Experience & Client Satisfaction:** Implemented caching and data compression, cutting page load time from 2 seconds to 10 ms and enhancing customer satisfaction.
- **Modular Architecture & Faster Deployment:** Architected modular portlets for Nokia Solutions Networks, enabling loosely coupled design that reduced deployment cycles by 30%.

Icicle Technologies - Web and SaaS solutions provider

Mumbai, India

Software Engineer

Oct 2008 – Feb 2010

- **Field Service Product Optimization:** Designed and developed core modules for an on-demand field service management system, improving task tracking efficiency and reducing completion time by 15%.
- **Data-Driven Decision Making:** Implemented dynamic data visualizations using GWT, empowering business leaders with real-time dashboards and reducing decision-making cycle time by 20%.

SKILLS

Technical Skills: Java, Python, JavaScript, SQL, RESTful Services, Kubernetes, Cloud (AWS), SQL

Data & Analytics: SQL, Time Series Forecasting, Predictive Modeling, Regression Analysis (Linear, Random Forest, Decision Tree, Logistic, K-means clustering)

Product Tools: Jira, Confluence, Jenkins, Git, Tableau

Product Management: Product Strategy, Agile Methodologies (Scrum, Kanban), User Stories, User Research, Wireframes.

Certifications: AWS Technical Essentials

EDUCATION

University of Washington – Michael G. Foster School of Business(expected)

Seattle, WA

Master of Science in Information Systems

June 2025 - June 2026

University of Mumbai

Mumbai, India

Bachelor of Engineering in Electronics

Jul 2003 – May 2007

ADDITIONAL INFORMATION

- Winner of 2025 Ascend Supply Chain Hackathon (financed by Cummins), driving the creation of an AI powered, adaptive scoring model to advance inclusive and resilient supply chains.
- Speaker at Open-Source India conference 2021, where I presented innovative blockchain-based solutions leveraging Ethereum for real-world applications.
- Certified yoga instructor by the International Yoga Alliance, actively teaching and collaborating with independent studios such as Discover Yoga, promoting holistic wellness through personalized instruction.
